

CarboTech Gruppe

Company Outline

- **Contact:** Mr. Rahul Desala
- **Email:** rahul.desala@carbotech.de
- **Website:** www.CarboTech.de
- **Founded:** 1989
- **Profile:**

CarboTech is one of the leading suppliers of powdered, granulated and extruded activated carbons in the world. Located in the coal-mining region in Germany, our integrated production plants manufacture, refine and package tailor-made activated carbons, activated coke and carbon molecular sieves made from hard coal, coconut coke and charcoal. With decades of experience as well as with the help of our own laboratories and impregnation facilities, we can produce highly individual, yet inexpensive activated carbons for your specific application.

Products

Our activated carbons are produced from various raw materials in a unique fluidized bed process, giving the activated carbon a highly uniform pore structure. This ensures that pollutants are bound homogeneously and consistently.

CarboTech's activated carbons can be used in a wide variety of applications

- Drinking water and wastewater treatment
- Groundwater remediation
- Treatment of liquids
- Hydrogen purification

CarboTech is known for its outstanding service and high quality.

Intended Cooperation

- Direct export to distributors, with experience in the field of activated carbon to address public plants
- Partner should have excellent contact in the end user segment
