

The Green Bridge

Company Outline

- **Contact:** Roman Brylka
- **E-Mail:** bry@the-green-bridge.com
- **Website:** <https://the-green-bridge.com/>
- **Founded:** 2021
- **Profile:**

The engineering firm The Green Bridge provides the entire consulting and planning services for conversion projects. In doing so, they manage all processes within the scope of the circular economy, especially in the case of built-up areas. The original buildings are not seen as a superfluous burden, but on the contrary as chests of raw materials. Up to 80 percent of the materials can be recycled, resulting in enormous savings in disposal costs. For the remaining 20%, TGB handles the logistics for disposal by means of an intelligent database system, thus avoiding unnecessary transport routes.

Services

- Conversion of derelict land to a new purpose, such as residential areas, commercial areas, ...
- establish cost-saving material cycles
- General planning and coordination for demolition and site clearance throughout the entire process
- Specialized planning of RC centers
- Specialization in the fields of mining, soil and groundwater/drinking water protection

Intended Cooperation

- Exchange with and consultation of ministries active in construction and environmental protection
- Contact with real estate owners for larger projects
