

Vision Green Solutions GmbH

Company Outline

- **Contact:** Sebastian Wurtz & Dr. Matthias Albert
- **Email:** wurtz@visiongreensolutions.com
- **Website:** www.VisionGreenSolutions.com
- **Founded:** 2019
- **Profile:**

Vision Green Solutions offers holistic solutions that innovatively implement, efficiently design and digitally network the hygiene component of your process. We are shaping our future together that we make excellent water sustainably usable and preserved for all. In the future we see, water is clean, energy-efficiently treated and safe. Together we analyze the existing hygiene solutions or the newly planned process. We integrate the hygiene component into the process in an energy-efficient and CO2-saving manner - And we do this with the latest technology and digitally networked. Every project has individual issues. We bring all the relevant specialists into the project team - to ensure optimal implementation on site.

Products

- **Proton-IQ®** used for drinking water, wastewater and holistic industrial disinfection and treatment, we develop individual solution concepts for our customers to supply themselves with innovative disinfection and cleaning solutions. These include the most innovative plant systems, flexible service packages and our self-learning analysis and control software.

Intended Cooperation

- **Distributors** direct exports
- **Manufacturers**
- **Consultancy/ service provider**
- The partner should have good know how in the water treatment business, track record in successful sales and should have inhouse technical support and a service team
